## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 16, 2010 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Application Publication No. US2002/0011544 to Bosson. Bosson discloses a method of integrating into a multi-display system (see Figs. 1, 12 and 13) a monitor (1) having screw holes (not shown) at the rear of the monitor for screwing an engagement means (i.e., four screws, not shown) to the monitor. See ¶ 0002, which describes the typical method of mounting monitor (1) having four screw holes onto a fixture or support (not shown). Bosson also discloses the method comprising providing a display system (see Figs. 3 and 13) having an arm (2) with at least two support members (90) for supporting at least two monitors, said engagement means (i.e., four screws, not shown) being

Art Unit: 2835

unsuitable for supporting the monitor on either of the two support members (90), inherently removing the engagement means (i.e., four screws, not shown) from the monitor by unscrewing, screwing a mounting bracket (95) to the rear of the monitor using the screw holes, said mounting bracket (95) being compatible with at least one of the at least two support members (90), and mounting the monitor (1) to the arm (2) with the at least one of the support members (90). See Figs. 1-4, 12 and 13, as well as ¶ 0040.

### ***Response to Arguments***

Applicant's arguments with respect to claim 21 have been considered but are moot in view of the new ground(s) of rejection.
